Education

GEC Bhavnagar, B.E. in Information Technology

July 2022 - June 2026

- CGPA: 8.48

Experience

Backend Developer | Tassos Consultancy Services

Jan 2026 - Present

- Developed and maintained backend modules for an HRMS-ERP system using Node.js, Express.js and PostgreSQL to manage employee, payroll, attendance and leave management operations.
- Designed and implemented RESTful APIs for multiple ERP modules including employee management, authentication, department handling, role-based access and reporting features.
- Integrated PostgreSQL database operations with optimized queries, relational mappings and transaction handling to ensure secure and efficient data management.
- Built authentication and authorization mechanisms using JWT and middleware-based role access control for Admin, HR and Employee panels.
- Worked on attendance tracking, payroll calculations, leave approval workflows and employee record management with proper validation and business logic handling.
- Collaborated with frontend developers to integrate APIs and ensure smooth communication between frontend and backend modules of the ERP system.
- Performed debugging, API testing and backend validation using Postman while resolving server-side issues and improving application stability. Used Git and GitHub for version control, code collaboration and project management in an Agile development environment.

.NET & Angular | Internship - Tatvasoft

July 2025

- Worked on backend development concepts using .NET framework and gained practical exposure to API development, routing and server-side application structure.
- Developed understanding of CRUD operations, REST APIs and database connectivity while working on assigned internship tasks and mini modules. Collaborated on technical assignments related to web application development while improving problem-solving and analytical skills.

Projects

AMPLIMENTOR - Mentorship Platform

Jan 2024 - May 2025

- Developed a web-based mentorship platform connecting students with mentors across multiple domains, enabling effective guidance and personalized learning experiences.
- Implemented features such as student-mentor matching, mentorship session scheduling, progress tracking and doubt-solving interactions.

Movie Zone – Movie Browsing Application

2025

- Developed a responsive movie browsing application using React and Vite, enabling users to explore movies across multiple categories and genres.
- Implemented reusable UI components and dynamic rendering techniques to display movie posters, release dates and detailed movie information efficiently.

HRMS – Human Resource Management System

2026

- Developed responsive user interfaces using Angular, HTML, CSS, Bootstrap, and TypeScript while gaining practical experience in frontend application development.
- Built reusable Angular components, implemented routing, reactive forms, and consumed REST APIs to display dynamic data. Collaborated on web application modules while strengthening problem-solving and frontend development skills.

Tech Skills

- **Programming Languages** : Java
- **Web Technologies** : HTML, CSS, Angular, React, Node.js
- **Database Management** : PostgreSQL, MySQL
- **Tools & Platforms** : VS Code, Kiro, GitHub, IntelliJ IDEA, Postman
- **Core Concepts** : Data Structures & Algorithms (DSA), OOP, DBMS
- **AI Development Tools** : ChatGPT, Claude AI, OpenAI Codex

Certificates

- Intel AI Certificate : Artificial Intelligence Fundamental
- Google Cloud Career Launchpad Program- GDEC
- Problem Solving (Beginner)- HackerRank
